

RITIK HEDAU

Java Full Stack Developer

✉ ritikhedau9@gmail.com ☎ 8815609602 📍 Noida, India 🌐 github.com/ritik-hedau18 🔗 ritikhedau.netlify.app

PROFILE

Java Full Stack Developer with 2+ years of experience building and shipping end-to-end web applications — from Spring Boot microservices and event-driven backends to responsive React frontends. Skilled in designing secure REST APIs with Spring Security and JWT, managing cloud infrastructure on AWS, and delivering production-ready UIs with React.js, TypeScript and Tailwind CSS. Experienced in AI-integrated backends using Spring AI and real-time distributed systems with Apache Kafka, Docker, and Kubernetes.

PROFESSIONAL EXPERIENCE

Java Full Stack Developer

Fastcurve Services Pvt. Ltd. • Full-time • Hybrid

04/2024 – Present
Noida, India

- **Architected and developed secure, multi-tenant SaaS microservices** using Java 17, Spring Boot, Hibernate, and Spring Security (JWT/RBAC) to support international logistics and retail client systems.
- **Engineered event-driven message pipelines using Apache Kafka** and optimized databases (PostgreSQL, MongoDB, Redis), reducing processing delays by 25% and API response latency by 30%.
- **Built responsive dashboards and user portals using React.js (React 19), Redux, and TypeScript**, leveraging pre-tested UI accelerators to improve frontend page load and rendering performance by 40%.
- **Containerized microservices with Docker, orchestrated deployments via Kubernetes, and provisioned AWS infrastructure** to ensure high availability, observability, and scalability across staging and production environments.
- **Collaborated within an Agile development environment** — contributing to sprint planning, daily stand-ups, code reviews, and retrospectives to ensure iterative delivery and consistent team alignment.

SKILLS

- Programming Language : Java, JavaScript, TypeScript
- Backend Frameworks: Spring Boot, Spring AI, Spring Security, Spring Data JPA, Hibernate, Spring Cloud, Microservices, RESTful APIs
- Frontend: React.js, Tailwind CSS, HTML, CSS, React Query, Context API
- Messaging & Cache: Apache Kafka, Redis
- Database: PostgreSQL, MongoDB, MySQL
- Cloud & DevOps: AWS (EC2, S3, RDS, IAM, CloudWatch, SNS, SQS), Docker, Kubernetes, Git, GitHub, CI/CD
- Developer Tools: Maven, Postman, IntelliJ IDEA, VS Code

PROJECTS

NEXUS — Neural Enterprise Knowledge Unification System 🔗

Spring Boot • Spring AI • Groq API • Jina AI • Qdrant • PostgreSQL • React 19 • TypeScript

- Engineered a full-stack **Retrieval-Augmented Generation (RAG)** platform enabling enterprises to ingest internal documents (PDF, DOCX, TXT), chunk and embed them via **Jina AI**, store vectors in **Qdrant**, and query knowledge through a conversational AI assistant powered by **Groq LLaMA-3.3-70b**
- Implemented **real-time SSE streaming chat** with persistent per-user conversation memory using Spring AI's JDBC ChatMemory, supporting context-aware follow-up questions with source citation extraction and display
- Developed a **responsive React 18 + TypeScript frontend** with Vite, featuring glassmorphism UI, real-time SSE chat streaming, drag-and-drop document ingestion, role-based admin dashboards, and JWT auth with auto-refresh/session syncing.

TRACE — Transaction Risk & Anomaly Classification Engine 🔗

Java 17, Spring Boot, Kafka, PostgreSQL, MongoDB, Docker

- **Architected a real-time fraud detection system with 7 Spring Boot microservices**, using Spring Cloud Gateway for JWT-authenticated routing, Eureka service discovery, and Swagger/OpenAPI documentation.
- **Built a pluggable rule engine (Strategy pattern) with 5 fraud detection rules** (velocity, high-amount, blacklist, odd-hour, new-device) that produce cumulative risk scores to auto-classify transactions as APPROVED, FLAGGED, or BLOCKED — triggering real-time email alerts for suspicious activity.
- **Designed an event-driven pipeline using Apache Kafka** for asynchronous risk scoring, email alerting, and immutable MongoDB audit logging; containerized the entire stack via Docker Compose with health checks and dependency ordering.

EDUCATION

Bachelor of Technology (B.Tech) – Mechanical Engineering 2018-2022
